

1           **VI. CLAIMS**

2  
3           What is claimed is:

4  
5           1.     A rooftop used in combination with jeep-type vehicles,  
6 comprising:

7  
8           A)     a substantially rectangular top wall having first, second, third,  
9 and fourth ends, said first and second ends parallel and equally spaced  
10 apart from each other by said third and fourth ends, said first end  
11 removably secured to a windshield frame of a jeep-type vehicle, said  
12 substantially rectangular top wall also having first and second elongated  
13 wedges; and

14  
15          B)     first and second side walls extending substantially  
16 perpendicularly from said third and fourth ends to form a rooftop for said  
17 jeep-type vehicle, said first and second side walls terminating at first and  
18 second bases respectfully and mount upon said jeep-type vehicle, said  
19 rooftop only covering a driver and front passenger cabin of said jeep-type  
20 vehicle.

21  
22          2.     The rooftop used in combination with jeep-type vehicles set  
23 forth in claim 1, further characterized in that said first and second  
24 elongated wedges extend from said first end to said first and second bases,  
25 said first and second elongated wedges having cooperative characteristics  
26 to receive door window frames of said jeep-type vehicle when said door  
27 window frames are in a closed position.

1           3.     The rooftop used in combination with jeep-type vehicles set  
2 forth in claim 2, further characterized in that said substantially rectangular  
3 top wall has a reinforced area defined as a support wall for structural  
4 integrity.

5  
6           4.     The rooftop used in combination with jeep-type vehicles set  
7 forth in claim 3, further characterized in that said substantially rectangular  
8 top wall has a sunroof assembly built within said support wall, said  
9 sunroof assembly at a first predetermined distance from said first end  
10 extending towards said second end without reaching said second end.

11  
12          5.     The rooftop used in combination with jeep-type vehicles set  
13 forth in claim 4, further characterized in that said rooftop is filled with a  
14 filler material to reduce ultra violet radiation and reduce exterior noise  
15 within said driver and front passenger cabin of said jeep-type vehicle.

16  
17          6.     The rooftop used in combination with jeep-type vehicles set  
18 forth in claim 5, further characterized in that said rooftop is made of a hard,  
19 lightweight, weatherproof plastic material.

20  
21          7.     A hard rooftop used in combination with jeep-type vehicles,  
22 comprising:

23  
24           A)     a substantially rectangular top wall having first, second, third,  
25 and fourth ends, said first and second ends parallel and equally spaced  
26 apart from each other by said third and fourth ends, said first end  
27 removably secured to a windshield frame of a jeep-type vehicle, said

1 substantially rectangular top wall also having first and second elongated  
2 wedges; and  
3

4 B) first and second side walls extending substantially  
5 perpendicularly from said third and fourth ends to form a rooftop for said  
6 jeep-type vehicle, said first and second side walls terminating at first and  
7 second bases respectfully and mount upon said jeep-type vehicle, said  
8 rooftop only covering a driver and front passenger cabin of said jeep-type  
9 vehicle, said first and second elongated wedges extend from said first end  
10 to said first and second bases, said first and second elongated wedges  
11 having cooperative characteristics to receive door window frames of said  
12 jeep-type vehicle when said door window frames are in a closed position.  
13

14 8. The hard rooftop used in combination with jeep-type vehicles  
15 set forth in claim 7, further characterized in that said substantially  
16 rectangular top wall has a reinforced area defined as a support wall for  
17 structural integrity, said substantially rectangular top wall has a sunroof  
18 assembly built within said support wall, said sunroof assembly at a first  
19 predetermined distance from said first end extending towards said second  
20 end without reaching said second end.  
21

22 9. The hard rooftop used in combination with jeep-type vehicles  
23 set forth in claim 8, further characterized in that said rooftop is filled with a  
24 filler material to reduce ultra violet radiation and reduce exterior noise  
25 within said driver and front passenger cabin of said jeep-type vehicle, and  
26 said rooftop is made of a lightweight, weatherproof plastic material.
